(54) Title: AN AUTOMATIC VENDING MACHINE FOR NOODLES

(57) Abstract: Disclosed is an automatic vending machine for noodles, capable of sanitarily cooking them. The automatic vending machine for noodles comprises a discharging hole, which is formed at the door, and it is opened and closed by a discharging door. A coin machine and a door are installed at the inside of the main body. A metallic disposable vessel for holding the noodles and spices is stored in the inside of the noodle storing part. The disposable vessels are automatically released from the noodles storing part by means of the disposable vessel supplying part. The disposable vessels are transmitted to predetermined positions by means of the disposable vessel conveying part. The disposable vessels are automatically released from the main body through the discharging door by the disposable vessel discharging part. The control part controls operations of the constitutional elements of the automatic vending machine as described above.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family
